## Kintetsu

"For KWE, one of the largest global forwarders from Japan, it has never been in any doubt whether to have a substantial presence at Amsterdam Airport Schiphol.

The renowned position of the airport as a European hub, as well as the well-balanced infrastructure to and from Schiphol by air, rail and surface transportation has proven its added value and supported KWE in its goals to grow and remain a leading global logistics supplier.

The pro-active approach of Amsterdam Airport Schiphol in the development of a professional logistics environment by creating high value logistics areas as a total concept, ranging from sophisticated warehouses and office buildings to a total open dialogue with potential buyers and tenants has resulted in KWE's decision to be located at Schiphol-Southeast.

It now has become the European gateway for inbound Japan traffic and outbound Johannesburg traffic. In addition, our Board of Directors in Japan decided to establish our EMEA head office in Amsterdam mainly because of the excellent facilities at KWE's hub at Schiphol-Southeast as well as the total airport city concept."

Martin Verdonk, Director Benelux KWE
